

Floristisch-geobotanisches Seminar

(zugleich „Floristische Abende“ des Vereins zur Erforschung der Flora Österreichs)

300134 SE Floristisch-geobotanisches Seminar

Leitung: Wolfgang Willner & Manfred A. Fischer

2.00 ECTS (1.00 SWS)

Do. 18–20 Uhr (ca. jede 2. Woche)

ÜR3, 1. Stock, Department für Botanik und Biodiversitätsforschung, Rennweg 14, 1030 Wien

Do. 3. November 2016

**Petr Koučeký: What is not in the keys but one has to learn:
hybrids of *Centaurea* (*Asteraceae*, *Cardueae*)**

Literatur:

KOUTECKÝ P., BAĐUROVÁ T., ŠTECH M., KOŠNAR J. & KARÁSEK J. (2011): Hybridization between diploid *Centaurea pseudophrygia* and tetraploid *C. jacea* (Asteraceae): The role of mixed pollination, unreduced gametes, and mentor effects. – *Biological Journal of the Linnean Society* **104**: 93–106

KOUTECKÝ P. (2012): A diploid drop in the tetraploid ocean: Hybridization and long-term survival of a singular population of *Centaurea weldeniana* Rchb. (Asteraceae), a taxon new to Austria. – *Plant Systematics and Evolution* **298**: 1349–1360

KOUTECKÝ P., ŠTĚPÁNEK J. & BAĐUROVÁ T. (2012): Differentiation between diploid and tetraploid *Centaurea phrygia*: mating barriers, morphology and geographic distribution. – *Preslia* **84**: 1–32

Gäste sind herzlich willkommen!
